

Malignant Mesothelioma - Can we improve quality of life?

Have you or a loved one been diagnosed with Mesothelioma in the last 6 weeks?

You and your loved one may be able to participate in a study looking to find out if giving regular specialist symptom control treatment earlier than usual, in mesothelioma treatment can improve quality of life and wellbeing for patients throughout the course of their illness. The study will look at whether this may also improve the wellbeing of family or friends closest to them.

To find out more about the study please visit our website: www.respect-meso.org or call 07718 423 428 to speak to a member of the study team.
